

# MOLD REMOVAL & REPAIR

## WE CAN STOP YOUR GROWING PROBLEM

Mold contamination can seriously damage a policyholder's property and belongings, and cause significant stress when the source of the odor, discoloration or possible health concern isn't immediately obvious. Figuring out how to deal with a mold problem can be confusing, so rely on the experts who make it their business to remove mold and repair the damage as quickly as possible.

### OUR PROVEN PROCESS:

- 1 Assess each unique situation
- 2 Report assessment
- 3 Eliminate contamination using physical barriers and negative air pressure
- 4 Determine best approach for removal and repair
- 5 Removal utilizing antimicrobial and anti-fungal treatments
- 6 Repair or restore damaged areas and belongings as necessary

### CONTAINED. CLEANED. RESTORED.

ServiceMaster Restore® partners directly with insurance companies to simplify the repair and claims process for both you and your policyholders. And our network of nationally recognized testing facilities lets us offer mold inspection, laboratory analysis and written remediation plans.

Our experts receive intensive, hands-on training so they're equipped to identify the source of the mold problem, eliminate it and help prevent spores from spreading. They'll work to restore your policyholder's home or business to pre-loss condition quickly and efficiently, making sure you and the property owner understand every part of the process as it happens.
