

EXCEPTIONAL CLEANING FOR EXCEPTIONAL TILE AND GROUT.

Tile has become a popular flooring choice for offices, lobbies, hallways, restrooms and kitchens. Unfortunately, high traffic gradually dulls the floors, and the grout becomes dark and unattractive with deeply embedded soils and dirt. Mopping only removes surface soil and not the embedded dirt.

ServiceMaster Clean® tile and grout experts use specialized, high-powered equipment to remove and extract the dirt and soil deep within, restoring your floors appearance to like-new condition.

Our tile and grout cleaning helps you avoid the expense and business interruption of completely replacing tile floors. And, our sealing product helps maintain the cleaned grout for months and allows your maintenance cleaning to be more effective.

A NAME YOU CAN TRUST.

ServiceMaster Clean has been providing an unparalleled level of clean for more than 60 years. Our research and development team works to ensure that we are using state-of-the-art products and processes to restore your tile and grout. Whatever your industry—healthcare, education, government, hospitality, property management, manufacturing or more—ServiceMaster Clean can improve your business environment. We're committed to your satisfaction. Nothing less will do.

Beyond just improving the appearance of tile and grout, professional cleaning by ServiceMaster Clean has several benefits:

- It can help extend the life of floors by removing debris that can weaken the tiles.
- It helps you avoid the expense and business interruption of completely replacing tile floors.
- We clean ceramic, porcelain, limestone and travertine tile and specialize in offices, lobbies, restrooms, kitchens, hallways and other tiled areas of a commercial property.
- Our sealing product helps maintain the cleaned grout for months and allows your maintenance cleaning to be more effective.
