

UPHOLSTERY CLEANING BY SERVICEMASTER CLEAN®

TAKE THE GUESSWORK OUT OF CLEANING UPHOLSTERY.

Sofas, chairs and even office partitions are in constant use and show soil and dirt quickly. Although not often visible to the naked eye, upholstery collects contaminants such as dead skin cells, oils and dust that can only be removed with a thorough professional cleaning by ServiceMaster Clean®.

Upholstered items also come in a variety of fabrics, textures and blends. It can be difficult for an untrained cleaner to look at the upholstery and know the right cleaning method. And asking maintenance staff to attempt cleaning upholstered items can result in improper cleaning that causes shrinkage, color bleeding or discoloration.

Our upholstery experts eliminate the guesswork and select the best cleaning method for your upholstery and its condition, utilizing equipment created to remove the most soil possible.

A NAME YOU CAN TRUST.

ServiceMaster Clean has been providing an unparalleled level of clean for more than 60 years. Our research and development team works to ensure that we are using state-of-the-art products and processes to improve the appearance of your upholstery. We guarantee the job is done right.
